

12 month Engineering Industrial Placement (Smurfit Kappa Corrugated UK)

Location: A UK site based on business need and candidate skills and interests

Salary: £18,500 plus up to £500 pm accommodation allowance

Smurfit Kappa Corrugated has 3 Engineering Industrial Placement vacancies in the UK this year providing opportunities to join engineering and manufacturing teams working on productivity improvement and capitalising on investments made.

We want our IPs to reach their full potential both personally and professionally, while making a real contribution to the bottom line, so we provide them with the perfect learning environment of innovation, motivation and support. They will receive on and off the job training, mentoring and coaching, in a real life, challenging work setting. The kind of people we are looking for will be confident and ambitious, with a natural flair for building relationships at all levels of business and outstanding communication skills. They will be self-motivated, tenacious and resilient, and comfortable working both alone and as part of a team.

To the successful candidate who fits the bill we are offering: a salary of £18,500, 25 days holiday + public holidays, accommodation allowance, life assurance, contributory pension scheme, and the possibility to be considered for fast track to our Engineering Graduate Training Scheme on graduating.

If you are up for the challenge, then please get in touch. Send your cv together with a covering letter explaining what it is about SK Corrugated and our training scheme which interests you to Catherine.smith@smurfitkappa.co.uk. by Friday 2 November 2018. Please note, you must be enrolled on an engineering degree programme which allows for a placement year, and eligible to work in the UK after graduation in order to apply.
